

PRODUCT: Aquacide 200

DESCRIPTION:

Aquacide 200 is a liquid 2-Bromo-2-Nitropropane-1, 3 Diol based microbiocide. Aquacide 200 is a registered product formulated to control microbiological growth in a wide range of applications. These include oil fields, paper mills, heat exchangers, cooling towers, condensers, air washers, pasteurizer cooling systems and metal working fluids. It also works as a preservative in latex emulsions, polymer lattices and adhesives.

SPECIFICATIONS:

Specific Gravity: 1.00

Color:..... Colorless

pH:..... 5.7

Guarantee: 2-Bromo-2 Nitropropane-1, 3 Diol, 10% by weight.

APPLICATION AND CONTROL:

Aquacide 200 should be fed neat as received direct to an area of rapid mixing. Feed rate and frequency will vary with the individual system or application. Feed rates and feed methods must be established by a representative of Alliance Water Group, not exceeding the registration guidelines.

PACKAGING:

20 Kg..... Pails

205 Kg..... Drums
