

PRODUCT: **Aquacide 210**

DESCRIPTION:

Aquacide 210 is a liquid dithiocarbamate based microbiocide. Aquacide 210 is formulated for use in open recirculating cooling systems for control of algae, bacteria and fungi. It is effective against a wide spectrum of organisms within a broad pH range. Aquacide 210 is particularly efficacious against problem sulfate reducing bacteria.

SPECIFICATIONS:

Specific Gravity: 1.01-1.06
Colour:..... Clear Green Liquid
pH:..... 12-13
Guarantee: 10% active potassium dimethyl-dithiocarbamate
Odour: Ammonia-Sulfide
P.C.P. Registration # 24230

APPLICATION AND CONTROL:

Aquacide 210 should be fed neat as received, direct to the tower sump or any area of rapid mixing. Feed rate and frequency will vary with individual system conditions and other factors such as weather and environmental contamination.

PACKAGING:

21 Kg..... Pails
217 Kg..... Drums
1060 Kg..... Totes

PRECAUTIONS:

- Avoid contact with skin, eyes, and clothing.
- Do not freeze.
- Consult M.S.D.S. and product label before handling.
- Not for use in potable water systems.
