

PRODUCT: Aquacide 295

DESCRIPTION:

Aquacide 295 is a strong oxidizing biocide provided in tablet form. When dissolved in water it generates hypobromous acid. It is registered for use in cooling systems, air washers, water scrubbers, cooling ponds and waste water treatment systems. Aquacide 295 effectively controls bacterial, algal and fungal slimes. It offers a safer, more effective alternative to chlorine based biocides for microbiological control.

SPECIFICATIONS:

Tablet Weight:..... 21 to 23 grams
Colour:..... Off white tablet
pH:..... 0.1% Solution - 3.5
Guarantee: 92.5% - 96.0%

APPLICATION AND CONTROL:

Feed rates and feed methods must be established by a representative of Alliance Water Group, not exceeding the registration guidelines.

If used in food processing establishments in cooling water systems and brewery pasteurizers the following conditions must be observed:

- (a) The water in the systems treated will not come in direct contact with food or beverage.
- (b) The amount of biocide product used is not in excess of that required to achieve the intended effect.
- (c) Residual chemicals from the product on the exterior of cans, bottles or containers are effectively removed by a potable water wash at the pasteurizer discharge end.

PACKAGING:

23 Kg..... Pails

PRECAUTIONS:

- Avoid contact with skin, eyes and clothing.
- Avoid contact with water during storage.
- Consult MSDS and product label before handling.
