

**PRODUCT:**                                   **Aquaflo 1010**

**DESCRIPTION:**

Aquaflo 1010 is a concentrated liquid fluorescent dye intended for use primarily in closed systems to assist in leak detection. Aquaflo 1010 has excellent visual colour formation at very low concentrations. Detection limits are further reduced with the use of a U.V. light source.

**SPECIFICATIONS:**

Specific Gravity: ..... 1.0  
Colour as concentrate: ..... red/brown  
Colour as dilute: ..... yellow green  
pH: ..... ~ 6.5  
Odour: ..... Odourless

**APPLICATION AND CONTROL:**

Aquaflo 1010 should be slug fed to the system at 250-300 ppm. (approximately 1 quart per 1000 Imp. gal. or .25 litres per 1000 litres.) Higher levels may be required for systems with very small or difficult to access leak areas. Detection is significantly enhanced with the use of a U.V. light source.

**PACKAGING:**

4 X 4 KG ..... Case lots (Poly jugs)  
20 KG ..... Poly pails  
205 KG ..... Poly drums

**PRECAUTIONS:**

- For industrial, Commercial and Institutional use only.
- Not for use in potable water systems.
- Do not take internally.
- Do not freeze.
- Consult MSDS and Label before use.
