

PRODUCT: **Aquapro 900**

DESCRIPTION:

Aquapro 900 is a liquid silicone emulsion based foam destabilizer formulated for use in applications where stable foams represent an aesthetic or operational problem. Aquapro 900 is effective in most applications where foam is generated by acids reacting with scales in cleaning applications. Aquapro 900 can also be used in other problem foam applications such as cooling towers, air washers, waste streams etc.

SPECIFICATIONS:

Specific Gravity: 1.0
Colour:..... White Emulsion
pH:..... 6.0
Odour: Odourless

APPLICATION AND CONTROL:

Aquapro 900 should be added neat as received direct to the problem area. The amount required will vary depending on system inventory and the severity and source of the problem.
