

PRODUCT: **Aquapro 901**

DESCRIPTION:

Aquapro 901 is a concentrated liquid borax based buffer solution formulated for use in closed hot and chilled water systems. Aquapro 901 has a unique stabilizing technology which allows higher than theoretical levels of borax in the blend.

SPECIFICATIONS:

Specific Gravity: 1.15-1.20
Colour:..... Clear, yellow liquid
pH:..... 12.0-13.0

APPLICATION AND CONTROL:

Aquapro 901 should be fed neat as required via pot feeder, injection pump or chemical proportioning pump. Aquapro 901 is recommended in systems where additional buffering is needed to maintain pH levels above 9.5 or as recommended by your service representative.

PACKAGING:

23 Kg..... Pails
67 Kg Carboys
238 Kg..... Drums
1170 Kg..... Totes
