

PRODUCT: **Aquasolv 711**

DESCRIPTION:

Aquasolv 711 is a highly concentrated acidic all organic formulation developed for use in cleaning external coils and air conditioning filters. Aquasolv 711 is biodegradable, non-polluting and non-flammable and compared to mineral acid based cleaners is much safer to handle and exposes the equipment to be cleaned to a far less aggressive environment. Aquasolv 711 has excellent wetting, penetrating and soil removal capabilities. Aquasolv 711 also helps to control rancid odours normally associated with oil and grease deposition. Aquasolv 711 does not contain hydro carbons or nonylphenols.

SPECIFICATIONS:

Appearance: Clear Brown Liquid
Odour: Mild aromatic
Specific Gravity: 1.09
pH: 2.0-2.2
R.I.: 23.0

APPLICATION AND CONTROL:

Aquasolv 711 is designed for direct application. The use rate will vary from full strength to a 1 part to 4 parts water dilution depending on the type and degree of soiling. Shut off the fan before application. It is best to pre-wet the surfaces thoroughly and then spray on the Aquasolv 711 at the selected dilution rate. Allow the cleaner to stay for 10 minutes or more before forced flush removal. Aquasolv 711 will also function as a self-rinsing cleaner relying on normal condensation for removal.

PACKAGING:

4 x 4 Kg Poly Jugs (1 case)
22 Kg Pails
223 Kg Drums

PRECAUTIONS:

- Avoid contact with skin, eyes, and clothing.
- Wear gloves and goggles when handling.
- Do not take internally.
- Do not freeze.
- Consult M.S.D.S. and product label before handling.
- Keep out of reach of children.
