

PRODUCT: **Aquasolv 720**

DESCRIPTION:

Aquasolv 720 “inhibited muriatic acid plus” is a 20 BE strength muriatic acid based cleaner. Aquasolv 720 contains effective inhibitors for steel and copper as well as foam suppressant and a dispersant - penetrant to assist in penetration and dispersal of unreactive portions of deposits. Aquasolv 720 is particularly effective in applications where deposits contain a significant percentage of carbonaceous material.

SPECIFICATIONS:

Specific Gravity: 1.15
Colour:..... Light Brown
pH:..... Less than 1.0
Odour: Choking chemical

APPLICATION AND CONTROL:

Aquasolv 720 is designed for use primarily in boilers or other vessels where scale or deposit removal is required. The amount of Aquasolv 720 required will depend on the vessel volume as well as the amount and composition of the deposit to be removed.

PACKAGING:

23 Kg..... Pails
236 Kg..... Drums

PRECAUTIONS:

- Extremely corrosive.
- Harmful vapours.
- Prevent all contact with skin, eyes, and clothing.
