

PRODUCT: Aquasolv 723

DESCRIPTION:

Aquasolv 723 is a multi-component solvent based liquid formulated to penetrate rust accumulations and effect release to facilitate removal. Aquasolv 723 is effective on most iron oxide accumulations and is particularly effective in assisting separation of rust bonded iron-steel components. Aquasolv 723 also contains film forming inhibitors to help protect metals from future oxidation.

SPECIFICATIONS:

Specific Gravity: 0.82
Colour:..... Dark Amber Liquid
pH:.....
Odour: Petro Solvent
Flash Point:..... 106° F T.C.C.

APPLICATION AND CONTROL:

Aquasolv 723 is most easily used via spray application. Sufficient Aquasolv 723 should be used to liberally coat the problem area. Brush coat or total immersion are also effective where conditions allow. With severe (heavy) accumulations repeated application may be required.

PACKAGING:

20 Kg..... Pails
205 Kg..... Drums

PRECAUTIONS:

- Avoid contact with skin, eyes and clothing.
- For industrial, institutional and commercial use only.
- Avoid breathing fumes and misted vapours.
- Flammable liquid and vapour, do not use spark sources or open flame.
- Consult M.S.D.S. and product label for additional information before handling.
- Do not freeze.
