

PRODUCT: **Aquasperse 501**

DESCRIPTION:

Aquasperse 501 is a blended liquid organic treatment formulated for use in open recirculating cooling systems where suspended solids or deposits are a problem. Aquasperse 501 is an effective dispersant which will control most inorganic water formed suspended solids as well as organic contaminants. In many cases this material will also remove existing deposits through re-suspension and normal system bleed off.

SPECIFICATIONS:

Specific Gravity: 1.03
Colour:..... Clear Colourless Liquid
pH:..... 8.3
Odour: Odourless

APPLICATION AND CONTROL:

Aquasperse 501 can be slug fed or metered into the system. Aquasperse 501 is compatible with most blended corrosion and scale inhibitors and can usually be added with the regular treatment program. Feed rates will vary depending on the severity of the solids loading and the type and amount of deposition in the system.

* **Note** * Check the compatibility of Aquasperse 501 with other chemicals before mixing.

PACKAGING:

21 Kg..... Pails
212 Kg..... Drums
1030 Kg..... Totes

PRECAUTIONS:

- Avoid contact with skin, eyes and clothing.
- For industrial, institutional and commercial use only.
- Not for use in potable water systems.
- Consult M.S.D.S. and product label for additional information before handling.
- Do not freeze.
