

PRODUCT: Aquatower 192

DESCRIPTION:

Aquatower 192 is a blended liquid corrosion inhibitor and deposition preventative formulated for use in open recirculating evaporative cooling systems. Aquatower 192 offers corrosion protection to all system metallurgies and controls solids deposition on heat exchange surfaces, to ensure efficient operation. In addition Aquatower 192 incorporates a very efficient cleaner/penetrant which in most applications will effectively remove existing deposits during normal system operation.

SPECIFICATIONS:

Specific Gravity: 1.12
Colour:..... Clear, yellow
pH:..... 11.5
Odour: Odourless

APPLICATION AND CONTROL:

Aquatower 192 can be fed neat from the container as received, or diluted as required with softened or demineralized water. Ideally feed should be proportionate to make-up via metered pump injection. Feed rates will vary depending on make-up water quality, system type and operating conditions.

PACKAGING:

22 Kg..... Pails
230 Kg..... Drums
1120 Kg..... Totes

PRECAUTIONS:

- For industrial, institutional and commercial use only.
- Avoid contact with skin, eyes, and clothing.
- Not for use in potable water systems.
- Consult M.S.D.S. and product label before handling.
- Do not freeze.
